

EOS Power exhibited at leading European tradeshow COMPAMED for the first time

Nov 21, 2019

EOS Power, the globally well-known designer, manufacturer, and seller of high efficiency open frame AC/DC power supplies for medical devices exhibited in the leading MedTech show COMPAMED in Dusseldorf (Germany) for the first time at a joint booth with its sales partner ACAL BFi.

EOS Power successfully exhibited its latest Medical grade power supplies like, High power (M)VPS 600 to 1000 Watt Series, Highly efficient and most selling small (M)WLP series 40 Watts to 350 Watts, the innovatively cooled (M)WLC550 which could be conduction rated and also can be used convection or forced air mode of operation, and the ultra flat (M)ULP with many features and accessories like PCB mounting option and power range from 40 Watts to 275 Watts.

All Product series are unique by their small size and high efficiency. They offer a high range of input voltage, low standby power, high MTBF and are available according to EN60601-1-2 4th Edition in medical class II/BF versions, including 2*Mopp, thermal shutdown and dual fusing.
