Dear Customers:

This declaration concerns European Union’s REACH regulation No.1907/2006 of 18 December 2006. REACH regulation is on Registration, Evaluation, Authorization and Restriction of Chemicals. It entered into force on 1st June 2007 to streamline and improve the former legislative framework on chemicals of the European Union (EU). REACH places greater responsibility on industry to manage the risks that chemicals may pose to the health and the environment.

EOS Power India Pvt. Ltd. has thoroughly reviewed the requirements of the REACH Directive, and the guidance documents (http://echa.europa.eu/web/guest/support/guidance-on-reach-and-clp-implementation) released by the European Chemicals Agency to date on implementation of this regulation. EOS Power India Pvt. Ltd. fulfills the role of an Article Supplier (see definition below). As such we have an obligation to report the presence of any Substances of Very High Concern (SVHC) in a concentration above 0.1% (w/w) in articles which we import, or distribute in the EU.

Following the review and based on the reports from sampled suppliers, it was concluded that below products do not intentionally release substances to the environment and no exposure to humans or the environment during normal or reasonably foreseeable conditions of use including disposal, therefore According to Article 7(3), notification is not required for EOS Power to ‘Register substances’. In addition, our product complies with the restrictions stated in Annex XVII of REACH.

The sum of each unique construction material in our articles imported into the E.U. is also less than one tonne per year. Given those conditions, below products are exempt from REACH pre-registration and later registration activities.

The current and latest ECHA candidate materials can be found at the following websites:
