Notes

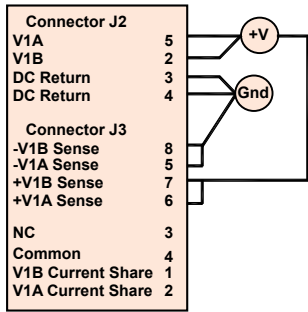

1. Maximum current per output channel. Do not exceed total output power rating.
2. Ripple is peak to peak with 20 MHz bandwidth and 10 μ F (Electrolytic capacitor) in parallel with a 0.1 μ F capacitor at rated line voltage and load ranges.
3. Power fail signal and power good signal on quad output models only.
4. Quad output models: The output section of the VLT130-4XXX is split into 2 independently regulated channels. Channel A consists of the main output V1 and auxiliary output V4. Channel B consists of the main output V2 and auxiliary output V3. The maximum output power that may be drawn per channel is 45 W with convection cooling or 65 W with fan cooling.
5. Single output models: The output section of the VLT130-1XXX is split into 2 independently regulated channels. Channel A consists of main output V1A. Channel B consists of main output V1B. An internal shunt resistor of value 0 Ohm connects both channels of the power supply. In an event whereby this shunt resistor is removed, the maximum output power that may be drawn per channel is 45 W with convection cooling or 65 W with fan cooling.
6. The use of remote sense function requires 300 LFM airflow.
7. Specifications are for nominal input voltage, 25°C and max. load unless otherwise stated.
8. Derate output power linearly to 80% from 90 VAC to 80 VAC input.

Single Output 1+1 Redundant Configuration

Quad Output 1+1 Redundant Configuration

- To connect the voltage sense pins 5, 6, 7 and 8 on connector J3 to the load, it is recommended to use 22 gauge twisted pair wire.
- For single output units, an internal 0 Ohm resistor shunt is used to internally connect the current share pins V1B current share (J3-2) and V1A current share (J3-1).
- Pins J3-4, Common, should be connected to ground for correct operation.
- The Power fail signal J3-3 is a TTL active high signal. The maximum source current is 0.45 mA and the maximum sink current is 0.25 mA.

Mechanical Drawing

- Notes: In case the PCB is mounted in a metal enclosure, using metal hardware ensure the following
- Stand off, used to mount PCB has OD of 5.4 mm max.
 - Screws, used to fix PCB on stand off, have head dia of 6.0 mm max.
 - Washer, if used, to have dia of 6.5 mm max.
